Dear Parents and Students, **Date: 23.10.2026**
Namasthe.

Greetings from the School!

In view of the changing climatic conditions and concerns regarding the El Niño effect, it is important that we recognise the need for responsible water usage and take immediate steps to conserve every drop of water.

We would like to bring to your attention that our school does not have a groundwater source and is entirely dependent on water tankers for its daily water requirements. We purchase water tankers every day to meet the needs of our students and staff. In the coming days, the availability and procurement of water tankers may become challenging, making it essential for all of us to practice strict water discipline.

Water conservation is no longer just a good habit; it is a shared responsibility. We seek the wholehearted cooperation of parents and students in ensuring that water is used carefully, both at home and on the school premises.

Water Discipline to Be Followed at School

All students are instructed to strictly follow these guidelines:

1. Use water only as required. Avoid unnecessary use of water in washrooms, washbasins and drinking-water areas.
2. Close taps immediately after washing hands or using water. Do not leave taps running.
3. Avoid playing with water or splashing it in washrooms and drinking-water areas.
4. Do not waste drinking water. Take only the quantity you can consume and avoid pouring unused drinking water into the washbasin.
5. Use washroom facilities responsibly. Avoid excessive flushing and unnecessary use of water.
6. Report leaking taps or overflowing tanks immediately to the teachers or school support staff.
7. Keep drinking-water areas clean and ensure that water is not spilled or wasted while filling bottles.
8. Follow teachers' instructions regarding the careful use of water throughout the school day.

Our Expectations from Parents

We request all parents to support the school's efforts by encouraging children to:

- Practice water-saving habits at home and at school.
- Avoid wasting water while brushing, bathing and washing.

MATRUSRI DAV PUBLIC SCHOOL

- Understand the importance of water conservation and motivate other family members to follow the same practices.

We also request parents to discuss the importance of water discipline with their children and help them understand that the water available at school is purchased with considerable effort and expense. Every drop wasted adds to the burden of ensuring an uninterrupted water supply for the entire school community.

A Collective Responsibility

We must remember that water is a precious and limited resource. As our school depends entirely on purchased water tankers, careless use and wastage of water could affect our ability to meet the daily needs of students and staff. Preventing such a situation requires the cooperation and discipline of every member of our school community.

Let us work together to build a culture of responsibility, sensitivity and respect for natural resources. Small efforts by each one of us can make a significant difference.

“Every Drop Counts — Save Water, Save Our Future!”

We sincerely seek your cooperation and support in making water conservation a daily practice and a shared commitment.

With warm regards,

K. Anandavalli
